

K10 Batteryless nP2UE Enclosure *Product/Green Sheet*

Custom Enclosure with Built-in SimulCharge™ Adapter for Lenovo Tab K10 Batteryless

Designed to work with the Lenovo Tab K10 Batteryless (TB-X6C6NB) tablet, the K10 Batteryless nP2UE enclosure features an integrated SimulCharge™ adapter to turn your device into a full-on tablet-based kiosk.

The built-in nSynC-P2UE K10 Batteryless adapter provides the tablet (sold separately) with simultaneous power and access to data. It features Power over Ethernet (PoE), wired Ethernet connectivity, two USB-A ports for connecting peripherals and Docking Detect.

Leveraging PoE technology, the enclosure does not require a dedicated AC source, as it can be fully powered through its built-in Ethernet port. Simultaneously, this port can provide 10/100 Ethernet connectivity between the tablet and network, providing a single cable solution for tablet power and data. It provides a 12-volt contract to the Lenovo Tab K10 Batteryless.

PoE allows greater options for placement as the enclosure can be used in areas with limited electrical outlets. It can be placed up to 328 ft (100 m) from the power source.

The enclosure offers two USB-A ports for peripherals, such as a scanner and printer. The K10 Batteryless nP2UE is ideal for running mobile POS systems, staff time clocks or digital signage.

The black, acrylic K10 Batteryless nP2UE enclosure also comes with standard VESA 100mm attachment points, which allow for easy tablet mounting and a wide array of personalized setups through VESA-standard commercial monitor arms and mounts.
