LAVA COMPUTER MFG INC.

Established in 1984, LAVA is a family-run Ukrainian-Canadian company, which originally focused on serial and parallel cards and adapters for the personal computer market. Since then, we have pivoted to mobile technology and have become a leader in connectivity solutions and battery protection for PCs & mobile devices across 53 countries.

MADE IN CANADA

EXPERT SERVICE

PURPOSE-BUILT

WHY LAVA

6+ years of battery life

Prevent battery bloating

Designed and built in Canada

LAVA thoroughly tests each product before it leaves our doors. We do not utilize sample testing, allowing us to catch errors right off the production line.

This also prevents hundreds of units from ending up in landfill since there's no chance for an entire batch to be marked faulty – something that is considered normal in sample testing.
